

**WELCOME TO THE  
INTERNET**

**I'LL BE YOUR  
GUIDE**

# Using Javascript with HTML

# Including JS files

```
<html>  
  <head>  
    <script src="ourcode.js" charset="utf-8"></script>  
  </head>  
  <body>  
  </body>  
</html>
```

# Vanilla JS To Do List Walkthrough

# Introducing jQuery

# Including jQuery

```
<html>
  <head>
    <script src="jquery.js" charset="utf-8"></script>
    <script src="ourcode.js" charset="utf-8"></script>
  </head>
  <body>
  </body>
</html>
```

# Including jQuery

```
$(document).ready(function() {  
  
    // your javascript code  
  
});
```

# jQuery Selectors

```
$ ( 'html' )
```

# jQuery Selectors

```
$ ( ' #header ' )
```

# jQuery Selectors

`$ ( ' . tasks ' )`

# Some useful methods

- `.clone()`
- `.text()`
- `.attr()`
- `.addClass()`
- `.append()`
- `.val()`
- `.parent()`
- `.remove()`

# .clone()

```
<ul id = "todos">  
  <li class = "greeting">Hello</li>  
</ul>
```

```
$( '.greeting' ).clone();
```

```
var greeting = $( '.greeting' ).clone();
```

.text()

```
<ul id = "todos">  
  <li class = "greeting">Hello</li>  
</ul>
```

```
$( '.greeting' ).text( );
```

```
$( '.greeting' ).text( 'Goodbye' );
```

# .attr()

```
<input type = "checkbox" id = "completed" >
```

```
$ ( '#completed' ) .attr ( 'checked', 'checked' ) ;
```

# .addClass()

```
<p>Pick up eggs</p>
```

```
.completed {  
  text-decoration: line-through;  
}
```

```
$ ( 'p' ) .addClass ( 'completed' ) ;
```

# .toggleClass()

```
<p>Pick up eggs</p>
```

```
.completed {  
  text-decoration: line-through;  
}
```

```
$('p').toggleClass('completed');
```

# .append()

```
<ul id = "groceryList">  
</ul>
```

```
$ ( ' #groceryList' ) .append ( ' <li>Egg</li>' ) ;
```

.val()

```
<input type = "text" id = "name">
```

```
$ ( ' #name ' ) .val ( ) ;
```

```
$ ( ' #name ' ) .val ( ' Colin ' ) ;
```

# Adding in what we've learned about Javascript

- Variable
- Loops
- Conditional If/Else
- Arrays & Objects
- Functions

# .append() in a function

```
function addToGroceryList(itemName) {  
    $('#groceryList').append('<li>' + itemName +  
        '</li>');  
}
```

```
addToGroceryList('eggs');
```

```
addToGroceryList('milk');
```

```
addToGroceryList('chicken');
```

# Event Handlers

```
<input type = "text" id = "name">
```

```
$( '#name' ).on( 'change', function(event) {  
    console.log( 'The name field changed!' );  
});
```

```
<input type = "text" id = "score">
```

```
$( '#score' ).on( 'change', function(event) {  
    var score = $( '#score' ).val();  
    if(score > 100) {  
        alert('The score is greater than 100');  
    } else {  
        alert('The score is less than 100');  
    }  
});
```

```
<button>Click me</button>
```

```
$( 'button' ).on( 'click', function(event) {  
    alert( 'The button was clicked' );  
});
```

# Context

```
<p>
```

```
  <button class = "delete">Click me</  
  button>
```

```
</p>
```

```
$( '.delete' ).on( 'click', function(event) {  
    $( this ).remove();    // deletes the <button>  
});
```

# Chaining

```
<p>  
  <button class = "delete">Click me</  
  button>  
</p>
```

```
$( '.delete' ).on( 'click', function(event) {  
    $( this ).parent().remove();    // deletes the <p>  
});
```
